SUMMARY

Frontend developer specializing in e-commerce, with experience on high-traffic platforms like Shopify Plus. I have worked with international companies such as Brandable, Pair Eyewear, and Warby Parker, focusing on performance, UX, and scalability. Passionate about technology and continuous learning, I actively contribute to the tech community and apply best practices in agile development, testing, and interdisciplinary collaboration.

PROFESSIONAL EXPERIENCE

Shopify Developer – Lyra Collective - January 2025 – Present · Remote (USA)

- Developed custom Shopify apps.
- Theme customization, third-party software integration, and UX/UI improvements.
- Fixed bugs and optimized performance across multiple brand storefronts.

Frontend Engineer – Brandable - August 2023 – December 2024 · Remote (New York, USA)

- Maintained and improved the frontend of Brandable, an Amazon analytics platform.
- Implemented new features, resolved bugs, made technical estimates, and wrote documentation.

React / Python Developer – Ioet - January 2021 – August 2023 · Remote

- Contractor for Pair Eyewear (React): developed and maintained the e-commerce headless site based on Shopify.
- Contractor for Warby Parker (Python): built features for the finance department to integrate insurance providers.
- Applied best practices (Clean Code, TDD) and participated in internal projects and hiring processes.

Software Consultant – Freelance - February 2020 – December 2020 · Remote

- Freelance development with Django, Flutter, Unity, Node.js. Contributed to open-source projects, including the electronic invoicing system “Verónica”.

Software Developer – Mivilsoft – February 2019 – February 2020 · Ambato, Ecuador

- Developed mobile apps with Android and Flutter for public transport. Backend development with Java and Python.
- Participated in launching and presenting internal product initiatives.
